

Feature:

- The water filtration circulation system
- Specially design for fine dust & concrete dust application
- Two fans motor high power, strong performance
- Tank sub assembly
- With socket (synchro function) to connect power tools.
- Cleanable dust bag, re-use it
- Liquid level monitoring function
- The rounding and hidden air intake and outlet design, low noise
- Side storage design, convenient
- Front and rear separated wheel, stable and durable

Specification	VC 38
Power Input (W)	1400
Voltage (V)	220 -240
Tank Material	Stainless Steel
Vacuum (kpa)	17
Container Capacity (L)	38
