EZR 24 R R/L

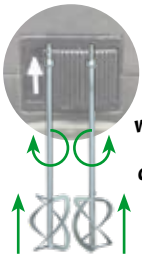

The stirrer for thorough mixing of tough,
heavy & multi-component materials

The powerful stirrer up to 80 kg of mixing material

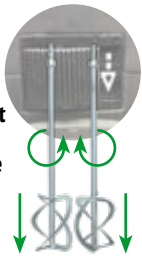

CLOCKWISE

Stirring rods pull material from the bottom to the top, few air inclusions, easy guiding

ANTICLOCKWISE

Stirring rods push material from the top to the bottom, less splash during mixing

without rod change

USE:

- Mixing clockwise of highly viscous and stiff materials, e.g. tile cement, ready-mixed mortar and plaster, screed, epoxy resins, sealants, granules, multi-component materials, coatings
- Mixing anticlockwise of building materials with low and middle viscosity, e.g. paint, glue, filler and leveling compounds
- Drywall construction, tiler, painter and plasterer, civil engineering, gardening and landscaping, floor renovators

FEATURES:

- Clockwise/anticlockwise: two mixed effects simply by switching – no need to change of the stirring rods
- Two contra rotating stirring rods – no counter torque, easy handling, saves time and effort
- Electronic switch – dust protected
- Soft start for less splashing
- Temperature control
- Stepless speed regulation and constant speed – optimum settings on the material to be mixed
- Wide, trapezium design, ergonomic handles and a high positioned center of gravity – easy, well balanced guiding of the machine for greater leverage
- Cap with labyrinth-guide – protection against dirt, stones, splash water etc.
- Damping and protection elements made of polyurethane – protection of the machine and the surface in case of unintentional fall
- PUR-construction site cable and a protected cable outlet – for heavy duty use

Technische Daten	EZR 24 R R/L SET
Power input	1800 W
Rated voltage	230 V ~
Rated speed	180-440 rpm
Total diameter rods	230 mm
Spindle connection	Special
Weight	7.1 kg
Bestellnummer	0774W000
Supplied	in a box incl. stirring rods Z 230

Stirring rods	Order no.
Z 200 (1 pair), up to 40 kg	31620000
Z 220 (1 pair), up to 60 kg	31610000
Z 230 (1 pair), up to 80 kg	31630000
