

Grinding

EZW 180.1

Powerful Angle Grinder Machine

EIBENSTOCK
P O S I T R O N

Use :

- Cutting Metal: The rapid rotation of cutting discs easily slices tough steel, iron, robber, pipes, angle iron, sheet metal, and more. You can make straight, curved, and beveled cuts in metal with ease.
- Grinding Metal: Grinding and flap discs remove rust, paint, welds, and metal material very efficiently. They are great for grinding welds smooth, sharpening tools, deburring metal edges, and general metal surface preparation.
- Cutting Masonry: Masonry cutting wheels cut tough concrete, brick, cement, tile, and stone cleanly and accurately. They are perfect for making cutouts in concrete walls, trimming brick surfaces, and slicing tile. Cutting metal with cutting discs.

Features:

- Powerful Motor
- Superb Service life
- Spindle lock - easy tool change
- For longer working hours powerful motor with 2600 watts.
- Well balanced design
- Excellent power to weight ratio.
- Light weight and short length for better ergonomics.

Specification	EZW 180.1
Input Supply Voltage (V)	220-240
Motor Input (W)	2600
Frequency (Hz)	50/60
Max. Disc Ø (mm)	180
No Load Speed (RPM) n_0	8500
Spindle Connection	M14
Weight (kg)	6.5
